Summary

As an advancing computer science & artificial intelligence student is to learn how to program and learn about the development of software, and learn to develop and integrate artificial intelligence into applications. I learned to do this by programming in C++ and Python. I also do HTML and CSS for website development. And have learned Database management using MySQL and SQL. And have enhanced my soft skills through working in jobs with teams to communicate with everyone.

Skills

- Bilingual- English and Spanish
- Programming Languages- Python, CSS, HTML, JavaScript, C++, and SQL
- Database Management System - MySQL
- Integrated Development Environment- Visual Studio, Visual Studio Code, Google Colaboratory, and PyCharm
